

Helping Designers Take Aircraft Electrification to a Whole New Level.

That's **Performance with Purpose**

Carlisle Interconnect Technologies offers a broad portfolio of products to help electric aircraft developers meet exacting size, weight, power, and efficiency requirements.

Energizing Interconnect Systems.

CarlisleIT has provided leading-edge designs that stand up to the demanding conditions of commercial and military flight, avionics, and space travel. These critical components include:

- High-Voltage Connectors and Wires
- Lightweight Terminal Blocks, Lugs, & Splices
- Aero & General-Purpose Wire and Cable
- Speciality and Filtered Connectors
- High-speed Digital Data Cables & Connectors
- Harsh Environment & Engine Cables
- Cable Assemblies & Complex Harnesses
- RF/Microwave Cable Assemblies
- Structures, Racks, and Trays
- Lightweight Shielding
- High-Speed Digital Data Cables and Connectors
- Contacts
- Installation Kits

Collaborating on Innovative Solutions.

CarlisleIT also offers custom design engineering and complete end-to-end solutions such as:

- Design, Engineering, and Analysis
- FAA and EASA certification consulting
- Complete structural and electrical manufacturing, including build-to-print
- In-house overbraiding
- Wide range of MIL-SPEC and RTCA validation testing
- Installation and field service technicians
- CarlisleIT is ITAR-compliant
